Director of election is not part of the slate.

Program Recommendations:

No changes in position; Redistricting position will be in La Palabra.

Program suggestions from local Leagues. Larson reported on three state program recommendations that were sent to Campbell:

Change education position: increasing drive license to age 17, and financial literacy as a high school graduation requirement

Financial literacy proposal is covered under the current position. This is so specific to graduation requirements, should it belong in the position? There are no further specific items in the position.

Motion: Mason moved that the board does not recommend this study because financial literacy as a graduation requirement can be supported under our current education position. Moscarella seconded; motion approved unanimously.

Process: Whether or not we will publish these positions in La Palabra and will go to Convention as a non-recommended item.

Raising driver's license to age 17 for a basic permanent license: unable to relate this proposed study to a current state position. Question what kind of priority the State League would give it.

Motion: Haaker moved that the board does not recommend this study because it is not in line with League priorities. Leverett seconded; motion approved unanimously.

Change language in the existing education proposal:

the use of health and social service teams in the schools and higher education institutions to identify and work with at-risk children and adults, with referrals to appropriate community agencies when necessary

Concern was raised (1) that these changes are substantive and (2) did the original study cover these changes and were they rejected.

Also suggested were recommended wording changes to the current education position based on the Broader, Bolder approach. Actual wording was not suggested. A study is not proposed; only a language change.

Motion: Burn moved that this recommendation be returned to proposer for further development. Lucero seconded; motion approved unanimously.

Las Cruces and CNM had no further proposals. Campbell reported on Water Study. Los Alamos has completed their local study and formed a consensus. During the new year, consensus questions and presentations at local Leagues

Motion: Lucero moved that the Board recommend continuing the water study. Mason seconded, motion passed unanimously.

Priorities will be part of the directions to the Board at the end of the Convention.
